

New Terlotherm[®] scrapers

Scraped surface heat exchanger

After extensive testing in the field, Terlet is now ready to launch worldwide the new scraper. The design of the new scraper as well as the choice of materials is the result of a 3 year testing period. Cleanability, strength and interaction between scraper material and walls have been major fields of research.

The very successful Terlotherm now has even more additional advantages compared to the competitors. Instead of a separate scraper holder and a scraper blade the new scrapers are an all in one design.

Advantages of the new scraper:

- Saves money, because of the all in one design
- Hygienic design
- Can replace the former separate scraper holder and blade
- Extended life time
- Consists of FDA, BGA and EU food approved material
- Operates from -300 up to 1500C (-220 up to 3000F)
- Chemical resistant
- Reduces maintenance cost and downtime
- Simplifies CIP procedures

The new all in one scraper

Terlotherm applications:

- Heating
- Aseptic cooling
- Deep-cooling
- Crystallisation
- Tempering
- Sterilization
- Pasteurization
- Polymerization
- Gelling

So don't hesitate and order the new scrapers now, please contact TERLET:
